DETAILED ACTION

Claims 1-10 and 12 are pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-6, 10 and 12 drawn to compounds, composition, method of use and process of making 3-(heterocyclyl)-substituted benzopyrazole of the formula I in claim 1, classified in class 548 subclass 300.1, 311.1, 312.4, 240, 243; class 504, subclass 221.

Group II, claim 7, drawn to process of making 3-(heterocyclyl)-substituted benzopyrazole of the formula I in claim 1, classified in class 548, subclass 356.1, 240.

Group III, claim 8 and 9 drawn to a benzoic acid ester of the formula III and 3-(heterocyclyl)benzene derivative of the formula V classified in class 548 subclass 240, 356.1, 366.1.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The species claimed do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: There is no significant common structural element on which the utility is described. They are different from each other and one reference applied to reject the invention of one group cannot be used for any other group for the same reason. Separate searches are required for each of the groups. They are patent ably distinct.

A telephone call was made to Attorney Herbert B. Keil on 2/18/02 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1616

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
